

SPH Series

Helical Performance Redefined

GAM

GAM Can. Just Ask.

SPH Series

The SPH series features helical gearing which brings a whole new level of power and precision to GAM's already extensive portfolio of gear reducer technology. With special attention paid to every aspect during development, the SPH gracefully combines design and engineering, to deliver our best inline planetary gear reducer yet. For dynamic and demanding servo applications where performance is critical, the SPH is highly powerful and efficient, yet smooth and quiet.

1. **Helical Gears** Precision cut and ground to quietly deliver higher torques and accuracies
2. **Adapter Flange** Custom machined to match any motor for easy installation
3. **Input Clamping Element** Low inertia and balanced for high speeds with a single tangential screw ensures a secure motor connection
4. **Bearings** Optimized taper roller bearings to accommodate high radial and axial loads
5. **Housing** Sleek and contoured steel housing with black oxide treatment for maximum durability
6. **Ring Gear** Machined directly into the single piece housing for maximum stiffness
7. **Output Shaft** Offered smooth or keyed and can be easily shortened if required

Available configurations for simple and compact machine integration

SPH-W

Shaft output design for mounting to pulleys and rack and pinion systems. Available with a smooth or keyed output shaft.

SPH-K

Features a bellows or a zero backlash elastomer-spider coupling on the output for maximum stiffness and the best results in highly dynamic applications. An output housing comes standard with custom housings available.

SPH-F

Same benefits as the SPH-K models without the housing on the output. Plug the gearbox directly into your machine and achieve a more compact design.

When your application is demanding...demand GAM's SPH

	LOW	HIGH	SUPERIOR	WHY GAM SPH?
Flexibility	Competition A		SPH	Configured to meet the application, not the other way around!
	Competition B			
Modifications & Customizations	Competition A		SPH	Flexible manufacturing and experienced engineering
	Competition B			
Performance			SPH	95 years of gear manufacturing experience
			Competition A	
			Competition B	
Quality			SPH	State of the art testing and measuring machines. ISO 9001 certified
			Competition A	
			Competition B	

The SPH is GAM's highest performing inline gear reducer

Designed for **dynamic**
& **cyclic** applications

Can be optimized for **high speed** and
continuous applications

Helical gears make the difference

The helical gear profile is cut at an angle that allows for gradual tooth engagement allowing for smooth, accurate, and quiet transmission. GAM's SPH gears are cut at the optimal helix angle to minimize resultant axial forces and they have a larger tooth width to maximize torque carrying capacity compared to the competition.

It all starts with the gears

The SPH's helical gears are produced to an extremely high level of quality and ground for further precision. With state of the art testing and measuring instruments and qualified personnel, we assure that the SPH will meet and exceed your requirements. With the SPH, every detail counts.

The following methods are applied:

- CNC coordinate measurement method
- CNC gear measurement method
- Mechanical measurement test
- Surface testing
- Thickness measurement
- Magnetic particle inspection
- Hardness testing
- Grinding burn inspection
